Oklahoma Department of Transportation

Traffic Advisory

I-40B/SH-34 – Beckham/Washita counties

Tuesday, Dec. 23, 2014

Correction

I-40B/SH-34 lane and ramp work begins in Elk City Monday, Dec. 29

Drivers can expect narrowed lanes and ramps and temporary lane shifts at the I-40 interchange with I-40B and SH-34 (Mile Marker 41) in Elk City beginning Monday, Dec. 29 and continuing through Fall 2015 for pavement resurfacing.

The east and westbound I-40 on-ramps are expected to close February through mid-March. All I-40 off-ramps will remain open to traffic throughout the project. Drivers should expect delays and plan additional travel time in the area or consider using the I-40 on and off-ramps at SH-6 (Mile Marker 38) to avoid construction.

In October, the Oklahoma Transportation Commission awarded a $5.4 million contract for this project to Duit Construction Co./TTK Construction Co. of Edmond.

Future updates will be sent out from this office as more information becomes available.
