WEEKLY UPDATE – Progress report by the numbers

Repairs to the US-77/SH-39 bridge between Purcell and Lexington are moving along steadily. As long as the weather continues to cooperate and the repair brackets continue to be delivered consistently, the steady pace will continue through the end of the project.

Of the 264 weakened areas...

- 226 areas have been pre-drilled for installation of repair brackets
- 132 areas have bracket installation in progress
- 93 full bracket assemblies have been delivered
- 26 repair brackets have been installed (not post tensioned)
- 10 repair brackets fully installed (post tensioned)

Post tensioning is the final step in the installation, where crews tighten the rods connecting the two brackets.

The deadline for completion of the project is June 14. The contractor will receive an incentive of \$1,500 for every hour early the repairs are completed. The department remains confident the contractor will take advantage of those incentives.

Please remember to continue checking the ODOT website for updates to the transit schedule and other information about the bridge.
