

**OKLAHOMA DEPARTMENT OF TRANSPORTATION  
SPECIAL PROVISIONS  
FOR  
CONCRETE BATCH TICKET REQUIREMENTS FOR  
PORTLAND CEMENT CONCRETE**

These Special Provisions revise, amend, and where in conflict, supersede applicable sections of the 1999 Standard Specifications for Highway Construction, English and Metric. Units of measurement are provided in the subsections in both English and Metric equivalents. The units for this project shall be those specified in the project plans. These Special Provisions apply to all Portland Cement Concrete batch tickets.

**414.04. Construction methods.** *(Amend to include the following:)*

- (d) **Mixing Concrete.** Ensure that each batch of concrete delivered has a printed or written batch ticket with all of the information required in AASHTO M157, Section 16, including the requirements listed in Subsections 16.2.1 through 16.2.6.

When the Contract requires that portland cement concrete pavements be paid by the delivered volume of concrete, ensure the use of an electronically-controlled automatic batch weight and printer system that indicates the net batch weight of materials delivered to the transporting vehicle. Ensure all the required weights and volumes are printed on the batch ticket.
