

OKLAHOMA DEPARTMENT OF TRANSPORTATION

FFY-2011 through FFY-2018 Construction Work Plan

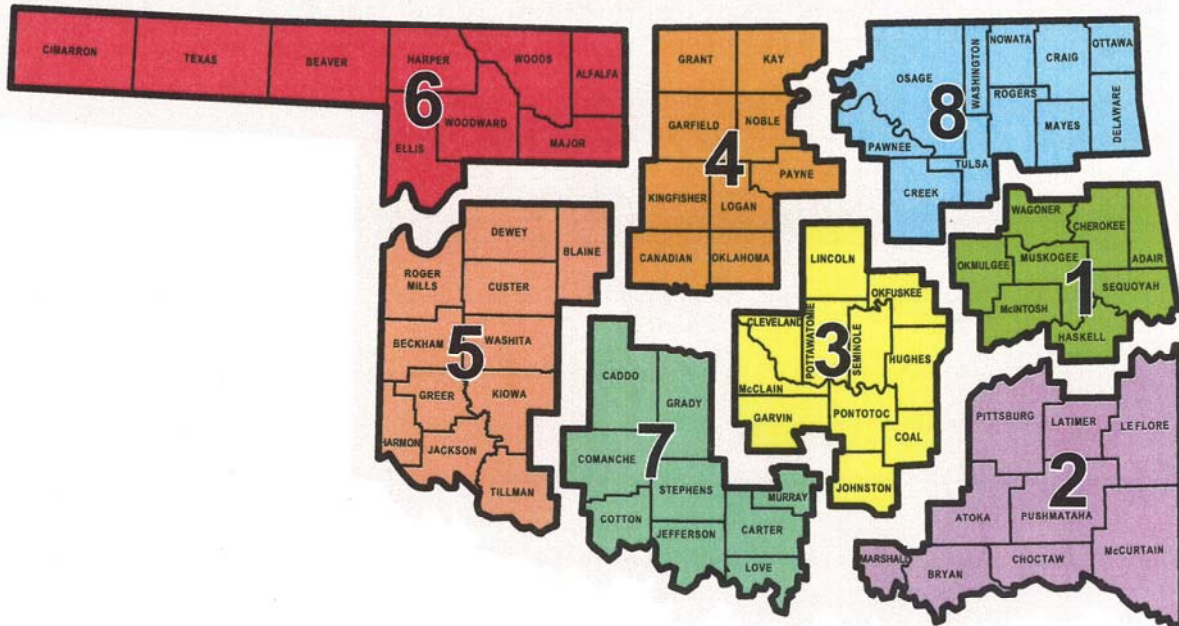

Table of Contents

SECTION I	FOREWORD - Letter from the Director
SECTION II	BUDGETARY PROJECTIONS
SECTION III	BALANCING PROCESS
SECTION IV	SUMMARY REPORT
SECTION V	CONSTRUCTION WORK PLAN Sorted by Federal Fiscal Year and by County

The Oklahoma Department of Transportation is pleased to provide the 2011-2018 Construction Work Plan, Volume VIII. The Plan encompasses State, Federal and Interstate highway improvement projects recommended through an annual validation and consideration process led by our eight Field Division Engineers and approved by the Transportation Commission.

As we continue the second decade of this 21st Century, it is only right that we take a moment to reflect on several of the significant events and occurrences of the previous decade and to highlight a few of our efforts to bolster the transportation system.

Y2K certainly came in like a lamb with both the Nation's power grid and our computer systems continuing to hum along. However, the calm enjoyed after beginning the new century was to be short lived and on September 11th of 2001 terrorists orchestrated a series of attacks unlike any experienced before on United States soil. These events not only sent our Country to war, but also sent our economy into a nose dive. As an inadvertent result, the budgetary crisis coupled with an unusually harsh winter set the stage to exact a heavy toll on the transportation system. As such, the Department scrambled to identify every opportunity to direct all possible resources to the care and maintenance of our existing highways just to keep them in service and passable. A "first of its kind" federally funded Pavement Preservation Program (3P) was forged in this adversity and has evolved into an important tool in our Asset Preservation tool box even today.

In the early hours of an overcast Sunday morning May 26th, 2002 an errant barge crashed into a bridge pier of the Interstate 40 Arkansas River bridge near Webbers Falls. This catastrophic event resulted in the collapse of several spans of the bridge and the tragic and heart wrenching loss of life. In one of the most incredible mobilizations in the Department's history, our forces sprang into action and detoured more than 20,000 trucks and passenger vehicles per day from the severed transportation artery onto a State highway system ill equipped to support such volumes. We then initiated the help of our consultants and contractors in a monumental effort to make emergency improvements to the pavements and bridges on the designated detours and to design and reconstruct the I-40 bridge structure. On July 29th, 2002, a short and record shattering two months later, traffic was resumed on the Interstate. While tragic in nature, the effort necessary to keep the detours operating served to galvanize our message that our resource starved highway system is nowhere close to passing muster and the event strengthened our resolve to improve the condition of our asset.

The same year the very first edition of this Construction Work Plan (2003 – 2010) was unveiled. This mission critical document has progressed to become the Department's steadfast guidebook for state and federal construction funding anticipations and in turn it mirrors our priorities and schedules our planned projects. It has assisted us in gaining and maintaining a focus that delivers projects in the year anticipated at a rate approaching 80%. When considering the lengthy and highly variable transportation project development process, a delivery rate of 80% is recognized as phenomenal and is the envy of many DOTs. In addition to clearly communicating our intentions, the CWP allows us to better plan and direct production resources and it empowers us to better understand our work loads and schedules in order to quickly make adjustments when necessary.

The year 2005 ushered in the passage of several landmark pieces of legislation and the introduction of new funding dedicated for the construction, care and maintenance of our transportation infrastructure. At that time more than 1,500 of our highway bridges were structurally deficient or functionally obsolete and 137 of those bridge structures across Oklahoma were posted as unable to carry a legally loaded truck. The downward spiral of our transportation infrastructure was tightening into a tailspin and the situation was on the verge of becoming unmanageable. Since 2005, these landmark State transportation funding initiatives have become the cornerstone for subsequent Legislatures to build upon. If these trends are sustained, these initiatives represent the true turning point for the future of Oklahoma's transportation asset.

Fast forward to the spring of 2009. Regardless of the motivations and politics of the American Recovery and Reinvestment Act, we can only speak to the reality that the Federal Legislation brought forth a \$465 million investment opportunity for the State, Local and County transportation systems in the State of Oklahoma. The Department stood ready to deliver and looked directly to accelerate the projects already defined and in the works as encompassed by our Construction Work Plan. By accelerating CWP projects, we were able to create a ripple effect in our annual rebalancing process that allowed many other projects to be accelerated across all eight years. Oklahoma consistently ranked in the top five States in the nation for the expeditious delivery of Recovery Act transportation projects and the obligation of funding. Today, we rank in the top five for the percentage of available Recovery Act dollars already paid out to Contractors for transportation improvement work they have completed.

Our priorities do not waver and our direction remains clear in this newest edition of the Construction Work Plan. We simply seek to eliminate Oklahoma's deficient and obsolete bridge problem and return our pavement surfaces to a state of good repair. We work to improve the safety of our rural two lane highways that suffer from a lack of adequate shoulders, blind intersections and poor sight distance and that have undesirable alignments with both steep hills and sharp curves. The Department continues to invest in both cable and concrete median barrier systems on our higher speed and higher volume facilities which can greatly reduce the potential for violent and horrific crossover accidents and fatalities. We are also working in our urban areas to improve the operation of the interstates and highways and to alleviate congestion causing bottlenecks. We would be remiss if we did not mention Oklahoma's two long developing major urban interstate improvement projects on Interstate 40 in downtown Oklahoma City and Interstate 44 east of the Arkansas River in Tulsa. These massive projects are on schedule for completion in 2012 and 2013 respectively.

The transportation accomplishments of the past decade are resounding and unparalleled in Oklahoma History. However, much work remains to be done to a system that was constructed and forgotten and no magic bullet exists. Livable communities, smart growth initiatives, transit systems, high speed rail and the self described alternative transportation modes of biking and walking to get where you are going simply will not impact the demands placed on our surface transportation system. We must recognize the need to sustain the historic state and federal surface transportation system investment levels while we drive the discussions of new transportation funding sources from conceptual ideas to reality. The need to move goods, services and people throughout this nation via the finest transportation system in the world will not cease. The question we must be prepared to answer is "Do we have the courage to lead or are we satisfied to follow?"

Gary M. Ridley
Secretary of Transportation

BUDGETARY PROJECTIONS

Budgetary Projections

CONSTRUCTION WORK PLAN - FFY 2011 through FFY 2018

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Construction Work Plan were established through a systematic evaluation of the Department's anticipated State-Aid and Federal-Aid revenues and expenditures. Projections were performed for Federal Fiscal Years 2011 - 2018 with the Federal Fiscal Year defined as beginning October 1st and ending on September 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State, Federal and Interstate highway system improvements and does not address Department earmarks or other mandated programs.

For the purposes of the initial projections, an estimated baseline State-Aid amount of \$62.7 million and an estimated Federal-Aid amount of \$339.1 million was utilized as the Fiscal Year 2011 benchmark. The Federal-Aid amount includes a 7.5% projection overstatement to avoid any potential loss of future Federal-Aid funds due to under programming. Of particular note, the annual baseline State-Aid amount available for Construction Work Plan projects is expected to grow to over \$279.2 million during the next eight years.

As the benchmark amount will vary based upon the results of the annual Congressional budgeting process, the estimated projections will require further adjustment and we will adapt our Construction Work Plan accordingly.

Once the Statewide projections are recorded by Fiscal Year, the following formula is applied to establish a baseline Fiscal Year projection for each Field Division:

$$\frac{\% \text{ of Population} + \% \text{ of Mainline Highway System Miles} + \% \text{ of Previous 15 Year Const. Program}}{3}$$

3

This formula considers common demographic, physical and historical criteria and yields a Divisional percentage that renders an equitable distribution of the available funds.

CORRIDOR PLAN PROJECTS

The budgetary projections for Federal Fiscal Years 2011 - 2018 are adjusted accordingly to reflect the debt service requirements of the Corridor Plan projects.

The individual project estimates exemplified in the Construction Work Plan constitute approximately 100% of the Federal Fiscal Years 2011 - 2018 anticipated available State and Federal formula funds including the 7.5% overstatement of Federal-Aid and the earmarked Interstate Maintenance funds and excludes the Corridor Plan debt service.

BALANCING PROCESS

Balancing Process

The balancing of the Construction Work Plan progressed in accordance with the roles and responsibilities generally defined in the following outline:

Field Division Engineers

The development of Construction Work Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility. In addition, other key Department Divisions collect and analyze transportation data factoring the following general characteristics as applicable and listed in no particular order:

- surface condition
- bridge condition
- geometrics (vertical and horizontal alignment)
- average annual daily traffic (AADT)
- percentage of truck traffic
- accident history
- local, regional and national traffic patterns
- capacity

The understanding gained from this information is then coupled with the careful consideration of the Field Division's condition and capacity assessments of the highway network and the associated critical needs, their anticipated improvement budgets, and further communication with the Division's Transportation Commissioner. The Field Division Engineers then review and validate the scheduled Construction Work Plan projects and formulate a group of new projects to be added in accordance with the projected funding availability.

Planning & Research Division

The Planning & Research Division is responsible for coordinating the State's transportation planning efforts with those of Oklahoma's Metropolitan Planning Organizations, and consulting with the tribal governments and local officials with responsibilities for transportation. The development of the Long Range Plan, the maintenance of the Statewide Transportation Improvement Plan as derived from the first four years of the ODOT Eight Year Construction Work Plan, Corridor Studies, as well as early project development all include opportunities for public participation and review. The results of this public involvement, input from ongoing coordination and consultation, and the planning documents are provided to the Field Division Engineers for their consideration as the Work Plan is developed.

Project Management Division

The Project Management Division works directly with and assists the Field Division Engineers in the development of their respective Division's Construction Work Plan and in the subsequent daily management of the project development activities. Projects proposed by the Field Division Engineers that did not previously exist in the Construction Work Plan

are validated to the extent possible in order to institute a preliminary scope, schedule and budget. Concurrently and to the extent possible, the scope, schedule and budget of projects that previously existed in the Construction Work Plan are re-validated.

The Project Management Division then continues to facilitate necessary modifications to the scope, schedule and/or budgets of approved Construction Work Plan projects as more detailed information becomes available during the course of Project Development. Validation of projects is accomplished through drive outs and/or other project team meetings with the complete participation of appropriate Preconstruction and Operations Divisions as deemed necessary. The responsible Project Manager schedules, coordinates, documents and facilitates these meetings.

Director, Deputy Director and the Chief Engineer

The Director, Deputy Director and Chief Engineer, in concert with the Director of Engineering, Director of Operations, Director of Capital Programs and Information Management, Director of Finance and Administration, the Programs Division, the Project Management Division and the Field Division Engineers work to fiscally constrain and balance the Construction Work Plan in accordance with the percentage requirements of the IM, NH, STP, and BR Federal funding categories. The Work Plan balancing is performed with foremost consideration for maintaining the integrity of the Field Division Engineer's and the Transportation Commissioner's project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate State and Federal budget projections.

ADDITIONAL CONSIDERATIONS

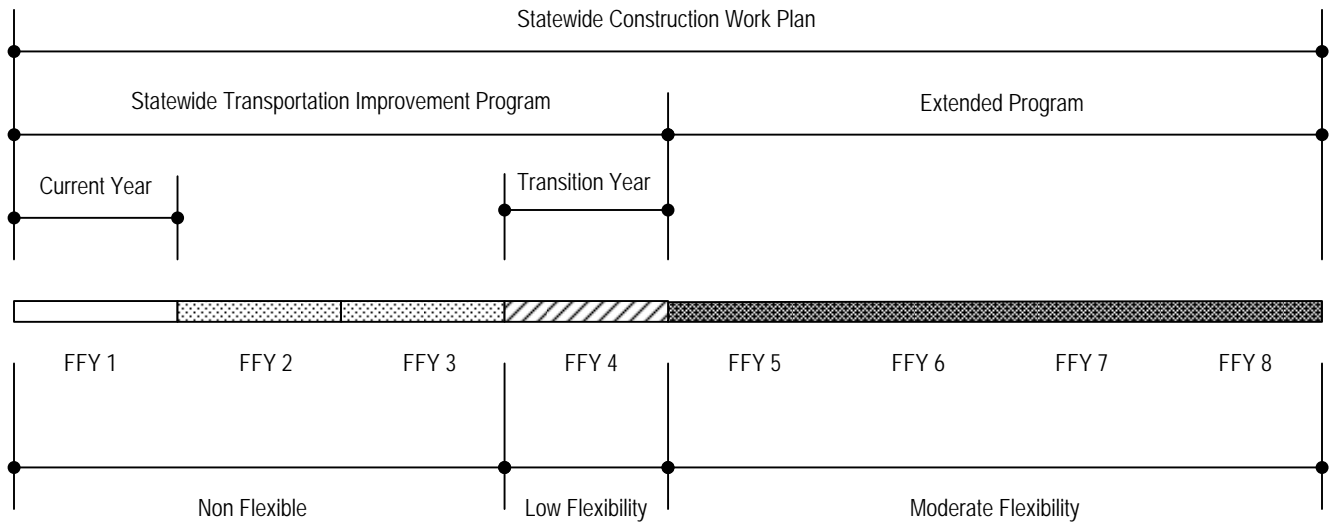

Given the number of extreme variables and the inherent need to maintain a balance between available funds and the Divisional funding commitments, the final Divisional projections are adjusted within a given year. Any adjustments are initiated with consideration for the debt service requirements of the Corridor Plan projects, the ability to schedule and prepare projects for construction in the appropriate Federal-Aid funding categories and the ability to sustain a reasonable annual Construction Work Plan in each Division.

The Construction Work Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

The Interstate Maintenance Earmarking commitment is continued and adjusted as necessary to encourage the substantial replacement, repair and preservation of the Interstate System. The IM Earmark commitment corresponds with the Divisional budgetary dedication by fiscal year.

The Programs Division and the Project Management Division will work in concert with the Field and Central Office Divisions to continue the monitoring and management of the Construction Work Plan in accordance with the provisions of the Construction Work Plan Management Process.

CONSTRUCTION WORK PLAN MANAGEMENT PROCESS

- Projects are "Locked"
- Only modified through formal Program Revision Process
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program
- Potential projects to be considered for current program "Lock"
- Refined project Scope/Schedule/Budget
- Prioritized by Year
- May set minimum criteria for inclusion
- Must Remain Balanced
- Evaluated yearly (July-August) to prepare for inclusion of Extended Program
- Varying levels of Project Development
- Flexible Scope/Schedule/Budget
- Prioritized by Year
- Must Remain Balanced
- Any project can be advanced for consideration in the Transition Year
- Evaluated yearly (July-August) to prepare for inclusion of Unscheduled Projects

CONSTRUCTION WORK PLAN SUMMARY REPORT
