SECTION V	CONSTRUCTION WORK PLAN Sorted by Federal Fiscal Year and by County

Presented for Transportation Commission Consideration September 8, 2014

FOREWORD

The Oklahoma Department of Transportation is pleased to provide the 2015-2022 Construction Work Plan which encompasses critically needed transportation improvement projects on our State highways, US highways, and Interstates. These projects are recommended through an annual validation and consideration process, led by our eight Field Division Engineers and approved by the Transportation Commission.

The 2015-2022 Construction Work Plan represents the twelfth volume, and as a constant with the Department since 2002, it guides both our consideration of new projects and our project development and project delivery strategies. This certainty is embodied through the laser focus that has been maintained on the systematic elimination of structurally deficient bridges on Oklahoma's highway system. The latest bridge inspection cycle identified 468 structurally deficient bridges remaining on the State's interstates and highways. Of those remaining, 143 are planned to be addressed prior to the end of the 2014 inspection cycle and all known structurally deficient bridges are scheduled to be addressed prior to the end of the decade.

Approval of the Plan also signifies the end of the current federal transportation bill Moving Ahead for Progress in the 21st Century (MAP-21) which was signed into law in 2012. Performance measures in the areas of safety, bridge condition and pavement condition were to be the benchmark of MAP-21. Thus far, progress on identifying the specifics of how to set the States' goals and to measure the performances in these areas have been slow in receiving national concurrence. Once these measures are agreed upon, the Department's transportation professionals must be prepared to incorporate these factors into the data collection, analysis and planning efforts. The Department also recognizes that a long term funding mechanism must be instituted to provide a growing and consistent investment in the nation's infrastructure. The Department is closely monitoring the development of the reauthorization of a long term transportation bill and the effect it may have on Oklahoma's ability to maintain our momentum and provide a transportation system in a state of good repair. Much of our future progress and our ability to deliver future Plans will be predicated on these decisions.

As this Plan is accomplished, Oklahoma's transportation future and our system will be safer and in a vastly improved condition for the concerted decisions we have made and the investment strategies we have implemented. For that opportunity, we extend our sincere appreciation to the citizens of the State of Oklahoma, Governor Fallin, Oklahoma's State and Federal legislative delegations, and the many transportation partners who support our charge and make it possible to achieve our mission.

J. Michael Patterson Executive Director

BUDGETARY PROJECTIONS

Budgetary Projections

CONSTRUCTION WORK PLAN - FFY 2015 through FFY 2022

The budgetary projections utilized for the basis of the fiscally responsible and financially balanced Construction Work Plan were established through a systematic evaluation of the Department's anticipated State-Aid and Federal-Aid revenues and expenditures. Projections were performed for Federal Fiscal Years 2015 - 2022 with the Federal Fiscal Year defined as beginning October 1st and ending on September 30th. The budgetary projections only address funding that has been historically and/or categorically committed to State, Federal and Interstate highway system improvements and does not address Department initiated set asides or other mandated programs.

For the purposes of the initial projections, an estimated baseline State-Aid amount of \$265.76 million and an estimated Federal-Aid amount of \$364.23 million was utilized as the Fiscal Year 2015 benchmark. The Federal-Aid amount includes a 7.5% projection overstatement to avoid any potential loss of future Federal-Aid funds due to under programming. Of particular note, the annual baseline State-Aid amount available for Construction Work Plan projects is expected to grow to over \$441.55 million during the next eight years.

As the Federal-Aid benchmark amount will vary based upon the results of the annual Congressional budgeting process, the estimated projections will require further adjustment and we will adapt our Construction Work Plan accordingly.

Once the Statewide projections are recorded by Fiscal Year, the following formula is applied to establish a baseline Fiscal Year projection for each Field Division:

<u>% of Population + % of Mainline Highway System Miles + % of Previous 15 Year Const. Program</u> 3

This formula considers common demographic, physical and historical criteria and yields a Divisional percentage that renders an equitable distribution of the available funds.

CORRIDOR PLAN PROJECTS

The budgetary projections for Federal Fiscal Years 2015 - 2022 are adjusted accordingly to reflect the debt service requirements of the Corridor Plan projects.

The individual project estimates exemplified in the Construction Work Plan constitute approximately 100% of the Federal Fiscal Years 2015 - 2022 anticipated available State and Federal formula funds including the 7.5% overstatement of Federal-Aid and any previously designated Interstate Maintenance funds and excludes the Corridor Plan debt service.

BALANCING PROCESS

Balancing Process

The balancing of the Construction Work Plan progressed in accordance with the roles and responsibilities generally defined in the following outline:

Field Division Engineers

The development of Construction Work Plan begins with our Field Division Engineers and is guided by their knowledge of the transportation needs and priorities in their respective Divisions. They and their staff work to maintain an understanding of the condition of the roads and bridges in their areas of responsibility. In addition, other key Department Divisions collect and analyze transportation data factoring the following general characteristics as applicable and listed in no particular order:

- surface condition
- bridge condition
- geometrics (vertical and horizontal alignment)
- average annual daily traffic (AADT)
- percentage of truck traffic
- accident history
- local, regional and national traffic patterns
- capacity

The understanding gained from this information is then coupled with the careful consideration of the Field Division's condition and capacity assessments of the highway network and the associated critical needs, their anticipated improvement budgets, and further communication with the Division's Transportation Commissioner. The Field Division Engineers then review and validate the scheduled Construction Work Plan projects and formulate a group of new projects to be added in accordance with the projected funding availability.

Strategic Asset & Performance Management Division and Programs Division

The Strategic Asset & Performance Management Division and Programs Division are responsible for coordinating the State's transportation planning efforts with those of Oklahoma's Metropolitan Planning Organizations, and consulting with the tribal governments and local officials with responsibilities for transportation. The development of the Long Range Plan, the maintenance of the Statewide Transportation Improvement Plan as derived from the first four years of the ODOT Eight Year Construction Work Plan, Corridor Studies, as well as early project development all include opportunities for public participation and review. The results of this public involvement, input from ongoing coordination and consultation, and the planning documents are provided to the Field Division Engineers for their consideration as the Work Plan is developed.

Project Management Division

The Project Management Division works directly with and assists the Field Division Engineers in the development of their respective Division's Construction Work Plan and in the subsequent daily management of the project development activities. Projects proposed by the Field Division Engineers that did not previously exist in the Construction Work Plan are validated to the extent possible in order to institute a preliminary scope, schedule and budget. Concurrently and to the extent possible, the scope, schedule and budget of projects that previously existed in the Construction Work Plan are re-validated.

The Project Management Division then continues to facilitate necessary modifications to the scope, schedule and/or budgets of approved Construction Work Plan projects as more detailed information becomes available during the course of Project Development. Validation of projects is accomplished through drive outs and/or other project team meetings with the complete participation of appropriate Engineering and Operations Divisions as deemed necessary. The responsible Project Manager schedules, coordinates, documents and facilitates these meetings.

Director, Deputy Director and the Chief Engineer

The Director, Deputy Director and the Chief Engineer, in concert with the Director of Engineering, Director of Operations, Director of Capital Programs, the Programs Division, the Project Management Division and the Field Division Engineers work to fiscally constrain and balance the Construction Work Plan in accordance with the allocation requirements of the applicable Federal funding categories. The Work Plan balancing is performed with foremost consideration for maintaining the integrity of the Field Division Engineer's and the Transportation Commissioner's project priorities. In addition, the balancing process seeks to insure that each Field Division is allocated available funding in accordance with the aggregate State and Federal budget projections.

ADDITIONAL CONSIDERATIONS

Given the number of extreme variables and the inherent need to maintain a balance between available funds and the Divisional funding commitments, the final Divisional projections are adjusted within a given year. Any adjustments are initiated with consideration for the ongoing debt service requirements of the previous Corridor Plan projects, the ability to schedule and prepare projects for construction in the appropriate Federal-Aid funding categories and the ability to sustain a reasonable annual Construction Work Plan in each Division.

The Construction Work Plan is balanced within these guidelines and has been determined to be an equitable representation to the satisfaction of the Department and the Transportation Commission.

The Interstate Maintenance Earmarking commitment is evident in years 2015 – 2018 as was determined necessary to encourage the substantial replacement, repair and preservation of the Interstate System. The IM Earmark commitment corresponds with the Divisional budgetary dedication by fiscal year, but has been discontinued beginning in 2019.

The Programs Division and the Project Management Division will work in concert with the Field and Central Office Divisions to continue the monitoring and management of the Construction Work Plan in accordance with the provisions of the Construction Work Plan Management Process.
