Notes for Above Table

M = Mandatory – All material used on Oklahoma DOT Specification projects must first have a satisfactory listing for the **Qualification Level Material**, thus acquiring the material to be approved listed for them.

O = Optional – Material may be qualified by project sampling prior to incorporation into project if samples can be taken and tested early enough in advance. Approval at project level has no bearing on Qualification Level test data or Qualification Level Material listings.

Definitions

Qualification Level Material - The material queried and reported on the (QM) Approved Lists appearing on the website. This material is not associated to the Producer/Supplier until such time that the qualification level has been achieved. No Sample records are ever created using this material and no test templates are associated to it. Effective and Expiration Dates (when relevant), as well as actual Approval Status for the qualification level are associated to this, and only this material.

Sampled / Tested Material – The material actually physically sampled and tested for the Qualification Level. Qualification test data templates are associated to this material and qualification sample records are created using this material to document qualification level tests. Only this material is listed for newly qualifying Producer/Suppliers until completion of qualification.

Materials Qualified and Listed to P/S – All materials listed to Producer / Supplier upon testing satisfactorily for the Qualification Level. With the exception of the Qualification Level Material, no Expiration Dates will be entered and each Approval Status will be set to “Verify qual015 Listing”.
