

**OHD L-45
METHOD OF TEST FOR
DETERMINING THE SPECIFIC GRAVITY AND UNIT WEIGHT
OF COMPACTED BITUMINOUS MIXTURES USING THE CORELOK™ APPARATUS**

Use AASHTO T 331 with the following exceptions:

1. Add reference to OHD L-14 and replace references to AASHTO T 166 with OHD L-14.
2. Delete section to calculate density of the specimen. Density, air voids, unit weight, and bulk specific gravity are detailed in OHD L-14.
3. Replace section 8.1.1 of T 331 with:
The vacuum settings of the device shall be verified once every year, after repairs, and after shipment or relocation, as a minimum.

Revision Date	Revision Description
9/30/14	Added item 3 to change vacuum gauge verification frequency.
8/15/14	Method completely replaced to reference AASHTO T 331 and OHD L-14.
