Aggregates - Multiple Optional Gradations on T27 Template

When sampling aggregates for the T27 - Sieve Analysis test template, Users will now begin to see multiple optional Gradation Dates in the header of the T27 template.
Different specification gradations will list for the template, depending on which Gradation Date Users select.
Since there is only a Gradation Date (no place for additional information), this QRG will list the optional dates and provide information as to when a date should be selected.

Following is a T27 template example with multiple optional Gradation Dates:

The following table lists frequently used aggregates / stone materials, optional Gradation Dates, and when each optional Gradation Date should be selected:

Aggregate / Stone Material	Gradation Date	Select this Gradation Date Whenever
All material codes with an **aggr** or **ston** prefix	01/01/99	The gradation is to comply with the OkDOT 1999 Standard Specifications
All material codes with an **aggr** or **ston** prefix	01/01/09	The gradation is to comply with the OkDOT 2009 Standard Specifications
aggr001 - Aggregate Base Aggregate Type A	01/01/57	The gradation is to comply with **aggr057** - HC Conc Aggregate No 57, Coarse (either the OkDOT 1999 or 200X Standard Specifications)
