Dear Mr. McCauley,

This letter serves as notification that, as Principal Chief acting under the authority of the powers vested in the Principal Chief of the Executive Branch in the Constitution of the Osage Nation, I hereby approve the 2014 Transportation Improvement Plan (TIP) submitted to me by the Osage Nation Roads Department.

The Osage Nation has been able to support many of the transportation needs of the area with many miles of new roads and multiple new bridges. As you well know, the needs of rural areas are many; particularly when it comes to meeting the needs of safe roads and bridges to travel to and from our daily activities.

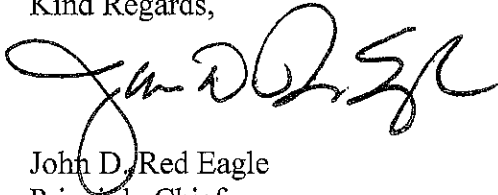

Although the transportation and safety needs are countless, I feel that the current TIP meets many of the most needed areas. I believe that the Roads Department ensures that the public has sufficient opportunities to participate in identifying current and future projects. Brochures, newspaper articles, Osage Nation website, public meetings, and regular communication with local leaders and transportation officials are examples of ways that the public is made aware of and able to participate in identifying projects for consideration to be included on our current and future construction plans.

The ability to contract directly with the FHWA has benefitted the Nation by providing a much more fluid administrative process and typically a smooth and timely program and funding agreement process. This serves as a good example for future self-governance opportunities and a true exercise in sovereignty.

I appreciate the working relationship with the FHWA staff and look forward to providing the Osage Nation with a better, safer transportation network.

Thank you for the time and attention in this matter. Please do not hesitate to contact my office if you need additional information or have questions. (918-287-5387).

Kind Regards,
