Welcome to the Supporting Forms for the HSIPR Program Track 2 Corridor Programs Application. This "Track 2 Component Project Data" form is made available to applicants who are prepared to provide detailed capital cost and other information on projects that make up a Track 2 Program for which they are applying. The form is similar, but not identical, to the Supporting Forms for Tracks 1a and 4. <u>One</u> "Track 2 Component Project Data" form would be submitted per project. Although project level supporting forms are optional at this time for Track 2, the submission of these forms together with the Track 2 application could potentially expedite funding of projects that are now ready for final design/ construction if the corridor program is selected for an HSIPR grant. If projects are not yet ready for final design/construction, the information contained in the "Track 2 Component Project Data" forms would be required prior to a grant award for those component projects.

To begin, save this Excel workbook to your computer and open the file. The buttons below will help you to easily navigate the forms contained in this file. To get started click on the button labeled "1. General Info."

Note 1: <u>Yellow cells require you to enter values (if applicable)</u> and <u>blue cells are set up to auto-populate</u> based on formulas that are embedded in the forms. These formulas are supplied for your convenience but you may choose to enter your own values into blue cells in which you do not wish to use the formulas provided.

Note 2: For purposes of this application, "Fiscal Year (FY)" refers to the Federal fiscal year (October 1-September 30).

Color Key for Completing this Form:

1. General Info. (click here first)

2. Capital Cost Info. (Standard Cost Categories for reference)

2a. Detailed Capital Cost Budget

2b. Annual Capital Cost Budget

3. Project Schedule

Please enter the requested data into the yellow cells.										
This information will auto-populate other areas of the Supporting Forms.

	FRA Standard Cost Categories for Capital Projects/Programs*	Notes
	CK STRUCTURES & TRACK	
10.01	Track structure: Viaduct	Include elevated track structure of significant length consisting of multiple spans of
10.02	Track structure: Major/Movable bridge	generally equal length Include all elevated track structures with a movable span, and/or with a span of significan
10.02	Track Structure. Major/Movable bridge	length (generally of approximately 400" or longer)
10.03	Track structure: Undergrade Bridges	Include elevated track structure of greater than 20 feet that does not fall into 10.01 and
10.00		10.02
10.04	Track structure: Culverts and drainage structures	Include all minor undergrade passageways (generally of 20 feet or less in width)
10.05	Track structure: Cut and Fill (> 4' height/depth)	Include grading and subgrade stabilization of roadbed
10.06	Track structure: At-grade (grading and subgrade stabilization)	All grading and subgrade stabilization of roadbed not included under cost categories 10.0
		through 10.05 and 10.07
10.07	Track structure: Tunnel	Definition self-explanatory
10.08	Track structure: Retaining walls and systems	Definition self-explanatory
10.09	Track new construction: Conventional ballasted	Include all ballasted track construction on prepared subgrade, on new or existing rights-o
10.10	Track new construction. Non-hollosted	way Include all slab, direct fixation, embedded, and other non-ballasted track construction on
10.10	Track new construction: Non-ballasted	prepared subgrade, on new or existing rights-of-way
10.11	Track rehabilitation: Ballast and surfacing	Include undercutting, ballast cleaning, tamping, and surfacing not associated with new
10.11	Track renabilitation. Dallast and surfacing	track construction
10.12	Track rehabilitation: Ditching and drainage	Definition self-explanatory
10.12	Track rehabilitation: Component replacement (rail, ties, etc)	Definition self-explanatory
10.14	Track: Special track work (switches, turnouts, insulated joints)	Include minor turnouts and interlocking, such as crossovers and turnouts at the ends of
		passing tracks
10.15	Track: Major interlockings	Significant interlockings at major stations and where routes converge from three or more
		directions
10.16	Track: Switch heaters (with power and control)	Include cost of power distribution equipment from commercial power source to interlockir
		location
10.17	Track: Vibration and noise dampening	Definition self-explanatory
10.18	Other linear structures including fencing, sound walls	Definition self-explanatory
		information systems; safety systems such as fire detection and prevention, security surveillance, access control, life safety systems, etc. Include all construction materials an labor regardless of who is performing the work.

40.07	Purchase or lease of real estate	If the value of right-of-way, land, and existing improvements is to be used as in-kind local match to the Federal funding of the project/program, include the total cost on this line item. In backup documentation, separate cost for land from cost for improvements. Identify whether items are leased, purchased or acquired through payment or for free. Include the costs for permanent surface and subsurface easements, trackage rights, etc.
40.08	Highway/pedestrian overpass/grade separations	Other than the grade separations included in this line item, highway-rail grade crossing safety
40.00	Relocation of existing households and businesses	enhancements generally fall under 50.06. In compliance with Uniform Relocation Act
	MUNICATIONS & SIGNALING	
	Wayside signaling equipment	Definition Self-explanatory
	Signal power access and distribution	Definition Self-explanatory
	On-board signaling equipment	Include on-board cab signal, Automatic Train Control (ATC), and Positive Train Control (PTC) related equipment
50.04	Traffic control and dispatching systems	Definition self-explanatory
50.05	Communications	Definition self-explanatory
	Grade crossing protection	Includes all types of highway-rail grade crossing safety enhancements except for grade separation projects, which fall under 40.08.
50.07	Hazard detectors: dragging equipment high water, slide, etc.	Definition self-explanatory
	Station train approach warning system	Definition self-explanatory
	TRIC TRACTION	
	Traction power transmission: High voltage	Definition self-explanatory
	Traction power supply: Substations	Definition self-explanatory
	Traction power distribution: Catenary and third rail	Definition self-explanatory
	Traction power control	Definition self-explanatory
70 VEHIC	CLES	Include professional services associated with the vehicle component of the project/program. These costs may include agency staff oversight and administration, vehicle consultants, design and manufacturing contractors, legal counsel, warranty and
		insurance costs, etc.
	Vehicle acquisition: Electric locomotive	Definition self-explanatory
	Vehicle acquisition: Non-electric locomotive	Definition self-explanatory
	Vehicle acquisition: Electric multiple unit	Definition self-explanatory
	Vehicle acquisition: Diesel multiple unit	Definition self-explanatory
	Veh acq: Loco-hauled passenger cars w/ ticketed space	Include cars with coach space, sleeping compartments, etc.
	Veh acq: Loco-hauled passenger cars w/o ticketed space	Include dedicated food service, lounge, baggage and other service support cars
	Vehicle acquisition: Maintenance of way vehicles	Definition self-explanatory
	Vehicle acquisition: Non-railroad support vehicles	Include hi-rail bucket trucks, and other highway vehicles
	Vehicle refurbishment: Electric locomotive	Definition self-explanatory
	Vehicle refurbishment: Non-electric locomotive	Definition self-explanatory
	Vehicle refurbishment: Electric multiple unit	Definition self-explanatory
	Vehicle refurbishment: Diesel multiple unit	Definition self-explanatory
	Veh refurb: Passeng. loco-hauled car w/ ticketed space Veh refurb: Non-passeng loco-hauled car w/o ticketed space	Include coaches, sleeping cars, etc. Include food service, lounge, baggage and other service support cars
	Vehicle refurbishment: Maintenance of way vehicles	Definition self-explanatory
	Spare parts	Definition self-explanatory
	ESSIONAL SERVICES (applies to Cats. 10-60)	Cat. 80 applies to Cats. 10-60. Cat. 80 includes all professional, technical and
	Service Development Plan/Service Environmental	management services related to the design and construction of infrastructure (Cats. 10 -
	Preliminary Engineering/Project Environmental	60) during the preliminary engineering, final design, and construction phases of the
	Final design	project/program (as applicable). This includes environmental work, design, engineering
	Project management for design and construction	and architectural services; specialty services such as safety or security analyses; value
	Construction administration & management	engineering, risk assessment, cost estimating, scheduling, ridership modeling and
	Professional liability and other non-construction insurance	analyses, auditing, legal services, administration and management, etc. by agency staff or
	Legal; Permits; Review Fees by other agencies, cities, etc.	outside consultants.
80.08	Surveys, testing, investigation	
	Engineering inspection	Definition self-explanatory
80.10	Start up	Definition self-explanatory
90 UNAL	LOCATED CONTINGENCY	Includes unallocated contingency, project/program reserves. Document allocated contingencies for individual line items on Detailed Capital Cost Budget.
100 FIN/	ANCE CHARGES	Include finance charges expected to be paid by the project/program sponsor/grantee prior
		to either the completion of the project or the fulfillment of the FRA funding commitment, whichever occurs later in time. Finance charges incurred after this date should not be included in Total Project Cost. Derive finance charges from the project's financial plan,
		based on an analysis of the sources and uses of funds.

*NOTE: To help evaluate and compare the costs of different projects, FRA has developed 10 main Standardized Capital Cost Categories. These are provided to establish consistency in the use of the worksheets. The SCC cost breakdown is based on a traditional Design Bid Build model. If your project is Design Build, to the best of your ability, separate construction costs from design, administration, testing, etc. Put all construction costs in 10 through 60. Put design, administration, testing, etc. in "80 Professional Services." If you are not sure where to put a certain element of the project, consider the issue in general terms, using this sheet as a guide.

Detailed Capital Cost Budget

Instructions:

To assist FRA in comparing projects, this form provides a breakdown of capital costs using Standard Cost Categories (SCCs). Definitions of FRA's SCCs can be found in the "Capital Cost Info" tab of this workbook.

The data you enter in this form should be drawn from budget estimates or analysis you have available for your project.

1. Enter values in the yellow cells below. You should only provide data for those cost categories associated with this project; leave others blank.

2. If the project has been applied for under Track 1a and/or Track 4, applicants may copy and paste the same "Applicant Inputs" (range bordered below in red) from the analogous sheet in the Track 1a or Track 4 application, into this form. In addition to Columns D-G, ensure that Category 90 Unallocated Contingency and Category 100 Finance Charges (located at the bottom of this form) are also entered.

3. The light blue cells will auto-populate based on the assumptions you entered in "General Info." If you did not enter assumptions, or you wish to change the auto-populated data, you may enter values in the light blue cells.

4. Explain any large discrete, identifiable, and/or unique capital investments in the space provided at the end of this form. Where an explanation is appropriate, place an asterisk in the far right column to denote that an explanation is provided. Please include the reference to the Cost Category number in your explanation. Example: "10.07: Tunnel at xxxx [location], x.x miles in length, consists of one twin-tube New Austrian Tunneling Method tunnel with cross-passages located every .25 miles."

5. For purposes of this application "Base Year Dollars" are Fiscal Year (FY) 2010 Dollars.

HSIPR Program Application Supporting Forms Track 2 Component Project Data

Annual Capital Cost Budget

Instructions:

This form should provide a breakdown by year of the capital costs entered in the previous "Detailed Capital Cost Budget". The data you enter in this form should be drawn from budget estimates or analysis you have available for your project.

1. In the yellow cells in the "Base Year/ FY 2010 Dollars" table, enter the annual dollar figures for each cost category in Base Year/FY 10 Dollars. In the yellow cells of the "Year of Expenditure (YOE)" table, enter the actual cost of FY 2009 activities. In both tables as appropriate, the blue cells will auto-populate with Base Year/FY 10 Dollars if you entered assumed inflation rates in the "General Info" tab. If you did not enter assumed inflation rates, or you wish to make your own calculations, you may enter values in the light blue cells. Note: This form should reflect Federal Government Fiscal Years (FY) from October 1 through September 30.

2. In the "Base Year/ FY 2010 Dollars" table, the numbers in the "Check Figures Taken from Detailed Budget" column will auto-populate from the "Detailed Capital Cost Budget" in the previous tab. The numbers in the "Base Yr/FY 10 Total" column will be the sum of the annual data entered to the left. Applicants may wish to compare these two columns as a double-check on their entries.

3. The light blue Year of Expenditure (YOE) information will auto-populate if you entered assumed inflation rates in the "General Info" tab. If you did not enter assumed inflation rates, or you wish to make your own calculations, you may enter values in the light blue cells.

For the purpose of this application, base year dollars are considered FY 2010 dollars.

Year-of-Expenditure(YOE) dollars are inflation-adjusted Base Year dollars. Applicants may determine their own inflation rate and enter it on the "General Info" tab. Applicants should also explain their proposed inflation assumptions (and methodology, if applicable) where indicated at the bottom of the "General Info" tab of this workbook, and in supporting documentation. See the Track 2 Application Form, Section B, Corridor Program Summary Question (3). t As a convenience to applicants in cross-checking their figures, this column shows the "Total Costs" by category in FY 2010 dollars carried over from the "Detailed Capital Cost Budget" sheet
