Economic Conditions Index[1]

Values for indicators for census block groups were divided by the county-wide value to create an indicator score

$$\frac{Block\ Group\ Unemployment\ Rate\ (5.14\%)}{Unemployment\ Score\ County\ Unemployment\ Rate\ (3.2\%)} = 1.61$$

Indicator scores for each census block group were summed and averaged to provide an overall Economic Conditions Index Score

Unemployment Index = 1.61
Family Poverty Index = 1.76
Housing Index = 2.97

Index score for block group = (1.61 + 1.76 + 2.97) / 3 = 2.11

[1] Calculated using Unemployment, Poverty, and Substandard Housing Indicators
